CONSTRUCTION

Donations & direct loans wanted

Planet 10 is a cultural association and participatory house project in Vienna.

Purchased in 2009 with the help of direct loans and donations, Planet 10 now offers living space for 4 adults and 3 children in 4 apartments.

But more access to **AFFORDABLE HOUSING FOR ALL** in anti-discriminatory structures is needed.

Together with GABU Heindl Architecture, we plan to build up to 6 upper floors to create more housing for those who need it most.

It all started with a few donations.

**WE ARE NOW
LOOKING FOR
FURTHER
SUPPORTERS.**

Planet 10 is a former carter's house. There are currently 4 apartments in it.

On the first floor there are function rooms and in the basement there is a small stage for events.

Planet 10 bought the house with the help of direct loans and donations in 2009 for € 400,000.

It is a small one-story building surrounded by multi-story municipal buildings, centrally located in Vienna's 10th district between the main train station, Viktor-Adler-Markt, the newly developed Sonnwendviertel urban development area and the lively pedestrian zone between the Reumann- and

Keplerplatz subway stations, which is used by a wide variety of population groups.

The house was purchased ready for occupancy, renovated by residents and association members, and expanded to include ramps and a barrier-free WC.

The apartments are available to people who are exposed to massive discrimination on the Viennese housing market and who, being new in Vienna and disadvantaged by structural racism, find it difficult to gain a foothold.

The house is very well established in different communities, multilingual, intersectional, participatory and barrier-free.

Planet 10's non-profit activities are known Vienna-wide and beyond, among refugee support contexts, queer-migrant support structures or queer-feminist collectives.

Currently 9 languages are spoken in the house. By the residents as well as the activists, who together organize the house, events, maintenance, etc. on a voluntary basis.

Very soon it became clear that 4 apartments could only be a beginning. The idea to expand the house was there from the beginning, because this option was already a great desire at the time of purchase and was clarified architecturally.

This project now seems tangible, as the association has received a large donation in 2022. This is the starting signal for new plans.

In 2023, a construction of 5 more floors plus attic (event and meeting space) on the existing basement, first floor and 1st floor will be started.

The architectural office Gabu Heindl, specialized in realizations of public cultural and social buildings, urban planning studies as well as research on planning policy and public space, and known for its collaboration with participatory structures, is entrusted with the planning.

For this, it needs your support.

Help make affordable housing possible for refugees in an anti-discriminatory, self-managed project house.

With your donations and direct loans*, together we can make this plan a reality

Planet 10 was supported by Mietshäusersyndikat Germany in its foundation. Direct loans of many individuals made the project possible in the first place.

The house, which is owned by the non-profit cultural association Planet 10, is to be transferred to the Mietshäusersyndikat-like Austrian organisation **habiTAT** in the near future.

Thus the house will be permanently removed thefrom the market.

This guarantees self-determined living also for destitute persons. It prevents housing speculation and neutralizes ownership.

What is a direct loan?
A directly lent amount without the detour via a bank at individually agreed conditions (amount, term, interest)

2016: A special mural was created at Planet 10

The artists Amoako Boafo and Ani Ganzala designed an entire wall in the event area of the house.

This mural will not be destroyed in the existing structure and Planet 10 offers the opportunity to purchase this work of art.

The painting was created during Amoako Boafo's student days in Vienna at the Academy of Fine Arts. Due to the stunning international success of the Ghanaian artist, the picture is now of immense value.

Both artists support the project with this extraordinary work of art, which was created especially for Planet10, by waiving a fee or the purchase price in favor of Planet 10.

We are happy about every donation or direct loan. No matter how much
